Tools: Postman, VS Code, Meistertask, PHPMyAdmin, Figma, Schema, Docker, Git, GitHub, AWS, PHP Storm, Ubuntu.

Applications

Property Management Software

- Built an application that allows landlords to add, delete, manage tenants info, and request maintenance repairs.
- Used **React** along with Webpack to build the main front end.
- Utilized **React Router** to link different components between the **React** application.
- Applied **ReactStrap** for designing the user experience of each page.

Sports Insider

- Built a page that presents live Twitter feeds, videos from YouTube, and Google News feeds leveraging public **APIs**.
- Created a section that displays upcoming events from nearby sporting events and concerts using Ticketmaster's **API**.
- Used **JavaScript** along with **Object Oriented Programming** to gather data by utilizing **AJAX** calls.
- Created **Meistertask** and **Fignas** to layout the basic look of our app.

Memory Match Game

- Combined **JavaScript** and **jQuery** to dynamically create main game function.
- Used **HTML5** for the basic layout of the game and applied **Bootstrap 4** along with **CSS3** for styling the game.

Professional Work History

Bringpro Inc, Irvine, CA - Operations Manager 2015 – 2019

- Part of the initial phases of a startup company that is an on demand and scheduled delivery service to customers and local businesses in Orange County.
- Worked alongside the executive team to develop the operational procedures and grow the team.
- Worked with developers to improve **UI/UX** experience as well as implement better features for the delivery team.
- Created marketing material using **Adobe Photoshop**, **Illustrator**, and **Lightroom**.

Education

- LearningFuze - Accelerated Web Development Program 700+ hours
 - Worked on hackathons, learned multiple programming languages, and built applications in a simulated workplace environment.
